INTRODUCTION

State of the Map Nigeria (SotM Nigeria) is the premier national conference dedicated to OpenStreetMap (OSM) and open geospatial technologies in Nigeria. Now in its fourth year, the 2025 edition will take place in Enugu State, bringing together a vibrant and diverse community of mappers, developers, researchers, humanitarian actors, government stakeholders, private sector leaders, and tech innovators under one roof.

Organized by Unique Mappers Network, Nigeria's foremost OSM community NGO, SotM Nigeria 2025 offers a powerful platform to explore how open mapping, AI-assisted geospatial solutions, and citizen engagement are shaping sustainable development across Nigeria and Africa.

With a growing footprint and international appeal, this year's conference is themed:

"Open Mapping for Change, Community Empowerment and Sustainable Development in Nigeria"

We invite organizations, development partners, and corporate sponsors to join us in making this impactful event a reality. Your support will help amplify local voices, accelerate innovation, and strengthen Nigeria's place in the global mapping ecosystem.

Mapping. Innovation. Impact.

VISION & MISSION

VISION

To be the leading platform in Nigeria for advancing open geospatial data, technology, and community collaboration to support inclusive and sustainable development.

MISSION

- Promote OpenStreetMap awareness and participation
- Empower local mapping communities.
- Support open geospatial education and innovation.
- Encourage data use for sustainable development.
- Foster collaboration across sectors.
